

ENVIRONMENTAL POLICY

The Aggregate and Quarry Association is committed to encouraging Members to minimise their impact on the environment whilst encouraging continual improvement in environmental performance.

Association Members will achieve this by:

- Identifying the environmental effects of our operations.
- Eliminating or minimising negative environmental impacts
- Utilising opportunities for positive environmental impacts
- Promote efficient use of resources.
- Consulting with community groups and interested parties.
- Monitor discharges to the environment.
- Report performance against consent conditions and targets.
- Complying with consents and other environmental laws.
- Continually improving the environmental performance of our operations and associated products.

The Aggregate and Quarry Association and its Members are committed to sustainable development of New Zealand's aggregate resources.
